

M. SIDDIQ KHAN

[LinkedIn](#) | m.siddiq2000@gmail.com | +18127785538 | Irvine, CA, United States

Education

Indiana University, Bloomington, IN, United States

May 2024

- Master of Science in Data Science GPA 3.71/4.00
- Relevant Coursework: Data Mining, Statistics, Applied Machine Learning, Advanced Database administration

University of Mumbai, India

May 2022

- Bachelor of Engineering in Mechanical Engineering GPA 8.7/10.0

Certifications and Licenses

Power BI Data Analyst Associate PL-300

Microsoft

Microsoft Certified: Azure Data Engineer Associate

Microsoft

Tableau Desktop Certified Associate

Tableau

Data Science & Machine Learning Career Track

Coding Ninjas India

Neural Networks and Deep Learning

DeepLearning.AI

Skills

Programming Languages

Python, R, SQL

Technologies

Tableau, Power BI, Azure, AWS, MS-Office Suite

Familiar OS

Windows, iOS

Courses

Exploratory Data Analysis, Computer Vision

Database Management, Data Visualization, Tableau

Professional Experience

Data Analyst – Morning Tea Solutions

May 2024 - Present

- Developed and optimized interactive Power BI dashboards and custom visualizations, enhancing report comprehension and reducing production time.
- Implemented advanced DAX queries and streamlined ETL processes with SQL and Python, improving performance by 20% and boosting data reliability.
- Optimized data models, reducing redundancy and decreasing dashboard refresh times by 50% for better real-time decision-making.

Data Engineer - Sirah Project

May 2023 - August 2023

- Collaborated on a digital humanities project at Indiana University, reconstructing and managing 1.2 million words of early Islamic literature across 147 historical texts, advancing research in digital humanities through innovative data processing.
- Developed custom Python scripts and automated pipelines to ingest, clean, and structure hundreds of raw data files, ensuring quality and consistency; integrated with GitHub for seamless updates to the website.
- Engineered a precision-enhancing algorithm for text reconstruction and designed a user-friendly interface with right-to-left Arabic support, improving usability and addressing critical project needs in web development.

Data Science Intern(TA) - Coding Ninjas India

May 2021 - August 2021

- Delivered tutorials on SQL, Tableau, Python, and data analysis libraries, enhancing students' practical skills and knowledge.
- Conducted weekly office hours, providing personalized support to over 25 students, improving comprehension and project completion rates.
- Assisted in debugging projects, reducing submission delays, and graded assignments while maintaining high academic standards and providing constructive feedback.

Projects

Football Transfer Market Analysis

- Developed a Python-based data visualization project, analyzing 5,000+ transfers (2013-2023) in top European leagues; applied statistical methods to identify trends in transfer fees and player valuations.
- Leveraged Pandas, Matplotlib, and Plotly for dynamic visualizations, uncovering patterns between transfer spending and team performance to inform strategic decision-making on player acquisitions.

Water Quality Portal

- Aggregated and cleaned a comprehensive dataset of 173,140 records, merging Water Quality Portal data with IRS income data, and designed a user-friendly interface for detailed analysis of 50 water quality characteristics.
- Conducted statistical analysis and developed an interactive PowerBI dashboard featuring visualizations to analyze key metrics, across counties from 2018 to 2023.
